CLIP JOINT™
EDUCATION

BARBER
BY CLIP JOINT

Creative barbering is about understanding the individual and creating contemporary, tailored shapes with precision and purpose. Barber by Clip Joint is a one-day masterclass for hairdressers and barbers looking to refine their skills and explore modern masculine haircutting. Led by the Clip Joint Creative Team, this masterclass combines technical foundations with creative thinking to inspire confident, individual results.
Discover how bone structure, growth patterns, density and natural texture influence the design process, and how an understanding of these elements allows you to create tailored shapes with intention, proportion and balance. Control silhouettes and refine detailing to express shape. The focus is on developing a thoughtful approach to barbering that moves beyond trends and responds to the individual.

Through technical demonstrations, creative exploration and practical application, you will gain fresh perspectives on shape, strengthen your cutting decisions and discover how traditional barbering principles can evolve into modern, personalised results.

DATES:	Monday 24 May 2027 and Monday 6 September 2027
